

networks that work.®

## Voice. Data. Video.

**BBH Solutions, Inc.** is a leading New York area provider of converged voice, data, and video solutions, cabling installation services, and custom IT service plans. Our staff of expert engineers and project managers is qualified and cross-trained several technology disciplines, including hardware, software, networking, and IP communications. We take pride in our commitment to match the right IT solution to your organization's business needs.

"Turn-key" is the key to the successful completion of complex IT projects. From a structured cabling system – the critical foundation of your network – to the endpoints that present business applications to your clients and co-workers; BBH Solutions can act as your single resource for design and implementation. After the project is complete, we'll support your organization's technology with a customized *BBHWorks* IT service plan.

## Our Specializations

### Cabling

Mostly hidden from sight, the quality of your cabling system has a direct impact on the performance of your IT. Our professional cable infrastructure team is certified to install all major brands of copper and fiber optic cabling and connectivity systems.

### Data Center

A properly sized, powered, and environmentally controlled data center is crucial to the existence of your network in the event of an unforeseen disaster or power outage. We've earned a reputation of reliability and professionalism as an APC sales, project management, and installation partner.

### Converged Networks

The number of business applications that run over the IP network is rapidly increasing. This gives your organization opportunities to maximize efficiencies while attaining a hard and fast ROI on technology investments. Thanks to our strong partnerships and breadth of capabilities, we can help you take advantage of all that the converged network has to offer for your business.

### Unified Communications

BBH Solutions provides Cisco Unified Communications systems that allow your business to change and grow at a moment's notice. With Cisco Unified Communications, your organization will gain new capabilities for more effective communications. You'll streamline business processes and improve profitability, while realizing a savings of hours per week for each mobile worker.

### Systems Integration

**networks that work.®** That means integration solutions that respond to your organization's mission and objectives. Through careful analysis of business processes and available technologies, we'll design and implement a tailor-made solution that brings together voice, data, and video technologies for optimal business communication. Because of our long-standing relationships with major technology manufacturers, we'll bring you best-of-breed solutions from:

- Cisco Systems
- Polycom
- Tandberg
- Citrix
- Hewlett Packard
- VMware
- BlackBerry
- IP Trade Networks

### Audio Visual

Recent breakthroughs in audio visual technologies are helping organizations collaborate more effectively with customers, employees, business partners, and students. Solutions designed to deliver customized, high-quality visual messaging on demand are transforming the way companies are doing business. Now, audio visual devices, content, and control are a working part of the converged network. BBH Solutions can help make this migration of yet another traditional stand-alone application to the IP network a seamless process.

BBH Solutions, Inc. is a proud recipient of Inc. 5000 honors as one of the fastest growing companies in 2008 & 2009.
